

Steven Ruíz

Front-End & Mobile Developer

Barranquilla, Colombia · +57 300 636 9312 · stevenruiz.p94@gmail.com

PROFESSIONAL PROFILE

Front-End & Mobile Developer with +7 years of experience building modern, scalable and cross-platform web and mobile applications. I have worked on projects across different industries, including e-commerce, administrative dashboards and mobile applications designed for field operations. Specialized in Angular, React, Next.js and React Native, with experience in TypeScript, JavaScript, RxJS and server-side rendering using Angular Universal and Next.js. I also have experience working with Firebase, Google Maps API and AI-assisted development tools.

Experienced in working with agile methodologies such as Scrum, collaborating with multidisciplinary teams and adapting to different project needs, challenges and scope changes. Currently based in Barranquilla, Colombia, and open to remote opportunities.

Services & APIs

Firebase · Google Maps API

Tools

Git · WordPress · AI-assisted development

Methodologies

Scrum · Agile

Professional Skills

Adaptability · Problem-solving · Teamwork · Continuous learning

PROFESSIONAL EXPERIENCE

Mobile & Front-End Developer

Grupo HSEQ · 2025 – Present

I developed cross-platform mobile applications using React Native and Expo for fieldwork and HSEQ-related processes. I also developed HSEQ Cloud, a web-based administration platform built with Next.js, Tailwind CSS, Firebase, and Google Maps, where I implemented features for managing users, tools and roles. In addition, I integrated geolocation through the Google Maps API to support field operations.

Front-End Developer

Binar10 Tecnología y Servicios · 2019 – Present

I developed and maintained e-commerce platforms and administrative dashboards using Angular, Angular Universal, RxJS, and NGX-Bootstrap. I built multi-company dashboards with charts, maps, and data visualization tools to facilitate data analysis and decision-making. I also developed e-commerce platforms for pharmaceutical products, incorporating server-side rendering (SSR) to improve performance and SEO, as well as product catalogs with region and category filters and Google Maps integrations. I have worked within multidisciplinary teams using Scrum, adapting to scope changes and evolving project requirements.

FEATURED PROJECTS

Puntos Saludables

Next.js · Google Maps · Tailwind CSS

Web platform that allows users to register, view information about their purchases, accumulate benefits and redeem rewards.

puntossaludables.com

SuperaT
